The Native Village of Chenega Bay, et al., v. Manuel Lujan, Jr., et al. (91-483 SS Civil) and Chenega Corporation, et al., v. Manuel Lujan, Jr., et al. (91-484 SS Civil)

Gentlemen:

For purposes of your review of the pending cases cited above and other claims arising from the Exxon Valdez oil spill of March 24, 1989, I want to bring to your attention some significant evidence concerning Exxon Corporation's and the Alyeska Pipeline Service Company's culpability.[1]

[1]The owner companies of Alyeska Pipeline Service Company ("Alyeska") are B.P. Pipelines Alaska, Inc. (50.01 percent); Exxon Pipeline Company (20.34 percent); Arco

As Chairman of the Subcommittee on Water, Power and Offshore Energy Resources, I have conducted an investigation of matters related to the Exxon Valdez oil spill, including the cleanup response, damage to natural resources, and operation of the Trans-Alaska Pipeline System.[2] The Committee on Interior and Insular Affairs was a principal author of the Trans-Alaska Pipeline Authorization Act (P.L. 93-153) and has broad jurisdiction concerning public lands and natural resources in Alaska and a special interest in issues affecting Alaska Natives.

In the course of this investigation, Alyeska has provided me with documents which indicate that Exxon and the other owner companies which control Alyeska: (1) knew that Alyeska could not effectively respond to an oil spill in Prince William Sound; (2) failed to make necessary improvements in Alyeska's oil spill response capabilities; and, (3) secretly decided that Alyeska would not respond to an oil spill in Prince William Sound in the manner prescribed by Alyeska's Oil Spill Contingency Plan.

Alyeska's Promises

Before the Pipeline Was Approved

In 1971, during the consideration of the trans-Alaska pipeline project, Alyeska's pollution control specialist R.L. Benyon promised the public in testimony before the Department of the Interior that:

> "The contingency plan which will be drawn up will detail methods for dealing promptly and effectively with any spill which may occur, so that its effect on the environment will be minimal. We have adequate knowledge for dealing with oil spills and improvements in techniques and equipment are continuing to become available through world-wide research. The best equipment, materials and expertise which will be made available as part of

---

Pipe Line Co. (20.34 percent); Mobil Alaska Pipeline Co. (4.08 percent); Amerada Hess Pipeline Corp. (1.5 percent); Unocal Pipeline Co. (1.36 percent); and Phillips Alaska Pipeline Corp. (1.36 percent).

[2]"Investigation of the Exxon Valdez Oil Spill, Prince William Sound, Alaska," Oversight Hearings before the Subcommittee on Water, Power and Offshore Energy Resources of the Committee on Interior and Insular Affairs (Serial No. 101-5, Parts I to V) (hereinafter "Investigation of the Exxon Valdez Oil Spill").

> the oil spill contingency plan, will make operations at Port Valdez and in Prince William Sound the safest in the world. [Emphasis added.]"

On April 10, 1973, the President of Alyeska, E.L. Patten, in testimony urging approval of the pipeline project, promised Congress that the very best technology would be in place:

> "In safety [sic] superior American tankers the light traffic between Valdez, Alaska, and the west coast involves hazards of less magnitude than any other tanker run of which I have knowledge. The most modern loading equipment and proposed vessel designs will reduce even these modest risks before pipeline authorization begins."[3]

In the Right-of-Way Agreements

In exchange for the right to build the Trans-Alaska Pipeline System on public lands, Alyeska signed right-of-way agreements with both the United States and the State of Alaska.

In the section on oil spill contingency plans in the right-of-way contract with the United States, Alyeska promised to control and clean up any oil spill:

> "It is the policy of the Department of the Interior that there should be no discharge of Oil or other pollutant into or upon lands or waters. Permittees must therefore recognize their prime responsibility for the protection of the public and environment from effects of spillage.... Permittees shall demonstrate their capability and readiness to execute the [contingency] plans....If during any phase of the construction, operation, maintenance or termination of the Pipeline, any Oil or other pollutant should be discharged from the Pipeline System, the control and total removal, disposal and cleaning up of such Oil or other pollutant, wherever found, shall be the responsibility of Permittees, regardless of fault. [Emphasis added.]"[4]

---

[3] "Oil and Natural Gas Pipeline Rights-of-Way," Hearings before the Subcommittee on Public Lands of the Committee on Interior and Insular Affairs (Serial 93-12) at p.526.

[4]Stipulation 2.14 to Agreement and Grant of Right-of-Way for Trans-Alaska Pipeline, January 23, 1974, between United States of America and Alyeska owners. As used in Stipulation 2.14, Oil Spill Control is defined as: (1) detection of the spill; (2) location of the spill; (3) confinement of the spill; and (4) cleanup of the spill.

> "Regularly scheduled training programs will be conducted....The objectives of this training program are:.....To maintain the Plans as fully operable working documents [and] To update the Plans to reflect state-of-the-art capability....Full scale, company-wide field exercises will be held at least once per year to insure overall readiness for response to large scale oil spills.... [Emphasis added."

Alyeska further promised in section 102 of the contingency plan that, as agent for the owner companies, it will effectively direct and conduct cleanup operations, including those related to any spill in Prince William Sound:

> "[C]leanup operations within the areas of liability and responsibility [imposed by law] will be conducted by Alyeska as Agent for the Owner companies and will be conducted in a manner as not to require assumption of control of such cleanup operations by federal or state officials....Alyeska will direct cleanup operations of spills resulting from...[O]peration, involving tankers carrying or destined to carry crude oil transported though the Trans-Alaska Pipeline System, occurring at Valdez terminal, in Port Valdez, Valdez arm or Prince William Sound. [Emphasis added.]"

Promises Versus Performance

In an addendum to its Oil Spill Contingency Plan in 1982, Alyeska informed the Alaska Department of Environmental Conservation that, in the event of a spill in Prince William Sound, the "[e]stimated time of completion of spill cleanup of a 100,000 barrel spill would be less than 48 hours."[7]

At the urging of the State of Alaska's Department of Environmental Conservation, Alyeska reluctantly included a response scenario for a 200,000 barrel spill in the 1987 Oil Spill Contingency Plan for Prince William Sound. "Alyeska believes it is highly unlikely a spill of this magnitude would occur."[8]

---

[7]Letter from B.L. Hilliker, manager, environmental protection and government reports, to Alaska Department of Environmental Conservation, dated June 22, 1982, reprinted in "Investigation of the Exxon Valdez Oil Spill," Part I at p. 894.

[8] Oil Spill Contingency Plan Prince William Sound (January 1987), p.3-54. By letter to the Alaska Department of Environmental Conservation dated October 23, 1986, Alyeska predicted that the probability of a 200,000 barrel spill occurring in Prince

This Prince William Sound response scenario assumed that the spill would occur 30 miles from the Valdez terminal and that weather conditions would be conducive to oil spill cleanup. The contingency plan called for equipment, including a barge, to be in place within 5 hours after the spill.

Alyeska's Prince William Sound contingency plan predicted that 35 percent of the oil would be recovered from the water (70,000 barrels), 30 percent recovered from shoreline cleanup, 30 percent to disperse naturally or evaporate, and only 5 percent to remain in the environment.[9]

Yet when the Exxon Valdez spilled some 260,000 barrels on March 23, 1989 the cumulative total of oil recovered within the first 72 hours was less than 3,000 barrels. As one example of the response failure, the equipment barge which the contingency plan relied upon was damaged and unloaded at the time of the spill. The barge did not reach the spill site for more than 14 hours, even though the contingency plan called for it to be on the scene within five hours. Based on my investigation, there were clearly not sufficient quantities of dispersants or application equipment available to make up for the utter failure of the mechanical recovery effort.[10]

Even under extraordinarily good weather conditions for the first three days, Alyeska did not have equipment or resources to contain and collect even a fraction of the amount specified in the contingency plan. The failure of Alyeska's cleanup response in the first 72 hours significantly contributed to the ultimate environmental impacts of the spill, since winds of over 70 miles per hour spread the slick completely out of control (more than 40 miles from Bligh Reef) by the fourth day.

The Exxon Valdez spill would eventually soil over 1,000 miles of Alaska's coastline, inflict one of the worst wildlife disasters in our nation's history, and disrupt the lives of thousands of Alaskans who depend on the natural resources of this region.

William Sound would be once in 241 years. "Investigation of the Exxon Valdez Oil Spill," Part I at p. 834.

[9]Oil Spill Contingency Plan Prince William Sound (January 1987) at p. 3-56.

[10]"Investigation of the Exxon Valdez Oil Spill, Prince William Sound, Alaska", Part I at p. 303.

As the Alaska Oil Spill Commission concluded, "[p]ublic pronouncements by Alyeska and its owners that the company employed the best available technology and committed adequate resources to safety purposes turned out to be false."[11]

Exxon and the Alyeska Owner Companies Knew That Alyeska Was Not Equipped to Effectively Respond To An Oil Spill in Prince William Sound.

My investigation revealed that Alyeska was on notice in 1984 that its own personnel believed they were incapable of effectively responding to an oil spill in Prince William Sound. James K. Woodle, former commander of the U.S. Coast Guard's Marine Safety Office in Valdez, and marine superintendent at the Valdez terminal, informed Alyeska's President George M. Nelson that:

> "Serious doubt exists that Alyeska would be able to contain and clean-up effectively a medium or large size oil spill....Response to any spill beyond the limits of Valdez narrows should not be attempted with present equipment and personnel. [Emphasis added.]"[12]

A series of documents, which I have enclosed, reveal that Alyeska by 1988 -- one year prior to the Exxon Valdez oil spill -- had reached the same conclusion as James K. Woodle: it was seriously unprepared for an oil spill in Prince William Sound.

On April 18, 1988, W.D. Howitt, then Alyeska's Valdez Marine Terminal Superintendent, wrote to the Marine Services Subcommittee -- comprised of representatives of the owner companies, including Harvey Borgan of Exxon Shipping -- to inform them of a meeting in Bellingham, Washington on May 18, 1988. "Oil Spill Response Equipment" was listed on the agenda [Exhibit A].

On April 28, 1988, Howitt wrote to the Marine Services Sub-committee members with additional information for the May 18 meeting [Exhibit B]:

> "The first part of the information package contains the T.L. Polasek briefing that was presented to the Operations Subcommittee on April 6-7, 1988, at the quarterly meeting. The briefing is the result of an action item from January's meeting during which a concern was raised by ARCO on

---

[11]Final Report of the Alaska Oil Spill Commission (February 1990) at p.135.

[12]Letter from James K. Woodle dated April 15, 1984 concerning operations of the Marine Department, Alyeska Marine Terminal, Valdez, Alaska, reprinted in "Investigation of the Exxon Valdez Oil Spill," Part I at p. 179 and 890.

At the time of the Exxon Valdez spill

According to the "purpose" section of Alyeska's Oil Spill Contingency Plan (the "contingency plan") which was in effect on March 23, 1989, Alyeska promised rapid and effective response to any oil spill using state-of-the-art technology:

> "The objective of the Alyeska Oil Spill Contingency Plan is to minimize damage to the environment...in the event of an oil spill..the resources of [Alyeska] are organized in a preplanned manner to assure rapid and effective response to any oil spill emergency. This manual outlines the techniques which will be in accordance with state-of-the-art oil spill cleanup technology. [Emphasis added.]"[5]

In section 102 of the contingency plan, Alyeska promised that it is the policy of the owner companies to fully comply with the laws and to take "every reasonable action" to minimize environmental damage from oil spills:

> "It is the policy of the eight owner companies, constituting the Permittees under the Federal Right-of-Way Grant and the Lessees under the State Right-of-Way Lease and represented by their agent, Alyeska Pipeline Service Company, to take every reasonable action to prevent oil spills and, if they occur, to minimize environmental damage. Alyeska will comply with the relevant pollution laws for the protection and conservation of environmental resources. [Emphasis added.]"[6]

Alyeska also promised in section 102 of the contingency plan that it will be fully prepared to implement the contingency plan even in the event of a major oil spill:

---

[5] Section 101, Alyeska Pipeline Service Company Oil Spill Contingency Plan General Provisions (January, 1987).

[6]The "relevant pollution laws" according to Alyeska are: "Alaska Statute Title 46, and 18 AAC75, and the National Oil and Hazardous Substances Pollution Contingency Plan, and any revisions thereof, as issued by the Council on Environmental Quality (CEQ) under the authority of the Federal Water Control Act [sic], as amended (Public Law 92-500). Alyeska Policy and these plans are intended to be written and executed so as to comply with the Grant and Agreement of Right-of-Way and the Right-of-Way lease with the United States of America and the State of Alaska, respectfully. Alyeska Pipeline Service Company will ensure that the National Contingency Plan is followed during any spill event." p.1-1

> Alyeska's capability to respond to oil spills at midpoint of Prince William Sound. [Emphasis added.]"[13]

Theo L. Polasek's (Alyeska's Vice President of Operations) briefing on April 6-7 for the Operations Subcommittee was entitled "Oil Spill Issues -- Status of Action Items from January Owners Meeting." [Exhibit C] The topic of "Alyeska's Response Capability to Spills at midpoint of Prince William Sound" is included under the heading "ARCO/Alyeska Response Equipment Discussions." What follows is a comparison of the equipment available to the "Clean Sound" Cooperative in Puget Sound, Washington. According to the document, Clean Sound's spill cleanup methodology is "immediate, fast response to spill, at any location, with boom to contain, exclude, and/or divert oil."

By contrast to the equipment available to Clean Sound, Polasek's briefing on "Present Alyeska Prince William Sound Capability" notes that "no new skimming vessels purchased since 1977." The list of Alyeska equipment is clearly deficient by comparison to Clean Sound.

Polasek's briefing on Alyeska's Prince William Sound cleanup response equipment includes the following indictment of Alyeska's capability to meet its obligations under its own Oil Spill Contingency Plan:

> "Immediate, fast response to mid-point of Prince William Sound not possible with present equipment complement." (emphasis added)

Exxon and the Alyeska Owner Companies Failed to Improve Alyeska's Oil Spill Response Capabilities Before the Exxon Valdez Spill on March 23, 1989.

Theo Polasek's briefings to the owner company representatives in April and May 1988 outlined the deficiencies in Alyeska's equipment including the fact that "no new skimming vessels had been purchased since 1977."

---

[13]Howitt's letter also states that purchases of clean-up equipment for Alyeska, as recommended by Jeff Shaw of Arco, would be discussed at the May 18th meeting. In a document with the heading "Alyeska Equipment Project (for oil spill cleanup)" dated March 22, 1988, Jeff Shaw recommends: 1) a large oceangoing skimmer; 2) a 10,000 barrel barge; 3) an adds pack; 4) fast spill response vessels; 5) a destroil skimmer with power pack; and 6) an additional 5,000 feet of sea quality boom. [Exhibit D] In addition, a separate document indicates that the marine subcommittee members discussed an advanced skimmer recovery system which could operate in open waters, the "Dynamic Inclined Plan Oil Vessel." [Exhibit E]

When Polasek testified, under oath, at a hearing I chaired in Valdez on May 7, 1989, he acknowledged that: "the equipment in this plan was similar to the plan in 1977. We increased the amount of boom and take [sic] other actions, but essentially that was the same equipment decided upon."[14]

Polasek's briefing includes a reference to the planned acquisition of a 10,000 barrel tank barge by late 1988. In fact, this oil spill barge -- the "Betty-K" -- was stored in Washington state for the winter of 1989 and was not available in the Exxon Valdez cleanup.

Moreover, Polasek's briefing refers to a "mobile contingency command center with communications repeaters" which would be installed by "mid 1988." In fact, such a system was not in place at the time of the Exxon Valdez spill.

Exxon and the Alyeska Owner Companies Secretly Decided that Alyeska Would Not Respond to an Oil Spill In Prince William Sound in the Manner Prescribed in the Contingency Plan.

According to a June 30, 1988 telex from Roger A. Gale, Manager, Marine Operations, Sohio Oil (now BP) to Polasek of Alyeska, the Marine Services Subcommittee decided to make five recommendations to the Owners Committee as part of an "acceptable compromise" [Exhibit F]:

First, the "current stockpile of clean up equipment is adequate" for spills at the terminal, but "should be maintained to the highest state of readiness."

Second, for spills in Prince William Sound, additional equipment should be purchased of the "type best suited for near shore and beach operations."

Third, a large barge (50-100,000 barrel capacity) equipped with ocean boom and skimmers was needed.

Fourth, a "study of the best and quickest methods of moving the barge around" including predeployment in Prince William Sound.

Fifth, that Alyeska and the owners "press" state and federal officials for "preapproval to use chemicals on a widespread basis."

---

[14]"Investigation of the Exxon Valdez Oil Spill, Prince William Sound," Part I at p. 155.

However, on July 6, 1988, Stanley Factor, Vice President, Chartering and Evaluations, Arco Marine, Inc., objected to Roger Gale's recommendations because the owners had already decided that Alyeska would not respond to spills in Prince William Sound in the manner required by the Oil Spill Contingency Plan [Exhibit G]:

> "Arco Marine Inc. does not agree with this telex nor do we concur that this represents the thoughts of the subcommittee.
>
> "At the owners committee meeting in Phoenix, it was decided that Alyeska would provide immediate response to oil spills in Valdez Arm and Valdez Narrows only. Further efforts in the Prince William Sound would be limited to the use of dispersants and any additional effort would be the responsibility of the spiller. [Emphasis added.]"[15]

Conclusion

At my subcommittee's hearing on May 7, 1989 in Valdez, Theo Polasek testified under oath on Alyeska's behalf that "[w]e fulfilled our promises in that [oil spill contingency] plan. We have not broken our promises to the people of this State."[16]

But the evidence I have set forth indicates that Alyeska broke the law as well as its promises to the State of Alaska and the Congress.

For example, section 309(c)(4) of the Clean Water Act (33 U.S.C. section 1319(c)(4) provides that substantial criminal penalties may be imposed upon any corporation or responsible corporate official that files information with Federal authorities with knowledge that the documents contain material misstatements.[17] In addition, criminal penalties may be imposed on any person who knowingly submits false information to any agency of the United States under 18 U.S.C. section 1001.[18]

---

[15]The Chairman of the Owners Committee at the time was Darrell Warner, President of Exxon Pipeline Company.

[16]"Investigation of the Exxon Valdez Oil Spill," Part I at p. 169.

[17] A fine of up to $10,000, or a prison term of up to two years or both may be imposed under this section.

[18]A fine of up to $10,000, or a prison term of up to five years, or both, may be imposed under this section.

Thus, since Alyeska knew that it could not and would not respond to an oil spill in Prince William Sound as required by its oil spill contingency plans, Alyeska and any responsible officer could be exposed to substantial criminal penalties. However, the Department of Justice has not even filed any criminal charges against Alyeska or its owner companies other than Exxon. Furthermore, in the proposed Criminal Plea Agreement, the United States would waive its rights not only to pursue any criminal charges against Alyeska and its owner companies, but also waive its rights to pursue civil or administrative penalties against Alyeska and its owner companies.[19]

The proposed Agreement and Consent Decree also provides generous protection for Alyeska. The United States and the State of Alaska both waive their rights to raise claims against Alyeska for natural resource damages in Paragraph 20. In addition, should either government recover any amount from Alyeska for claims of any kind, Exxon is entitled to be reimbursed for 20.34 percent of the governments' recovery (this figure represents the percentage ownership by Exxon of Alyeska). Yet Alyeska, including its shareholders and owner companies other than Exxon Pipeline, expressly reserves their rights to sue the United States or the State of Alaska in Paragraph 19 of the proposed settlement agreement.

In my view, the inclusion of Alyeska in the proposed Criminal Plea Agreement and in the proposed settlement Agreement and Consent Decree is contrary to the public interest. Based on the evidence, it is inconceivable that the Department of Justice would waive its rights to pursue criminal claims, and virtually all civil claims, against Alyeska.

In sum, the proposed Exxon settlement fails to hold Alyeska accountable to the public for its wrongdoing and fails to serve as a deterrent for similar conduct in the future.[20]

---

[19] Section III.A. of the Plea Agreement states that "[t]he United States agrees not to seek additional criminal charges or any civil or administrative penalties.... against Alyeska Pipeline Service Company or any of its shareholders or owner companies or present or former shareholder representatives, for any violation of federal law arising out of the grounding of the 'EXXON VALDEZ,' the resulting oil spill, the containment or cleanup of that spill, or its or their conduct in connection with the preparation or submission of oil spill contingency plans or related, by Alyeska Pipeline Service Company to the federal or state government...." p.5.

[20]Under Alaska law, punitive damages are awarded for the public policy reasons of punishment and deterrent when the defendant's conduct was outrageous, reckless, or malicious. In this instance, there is clear and convincing evidence that Alyeska's conduct merits the award of punitive damages.

After extensive debate about the environmental risks, the Trans-Alaska Pipeline System was approved in 1973 by only a one-vote margin in the U.S. Senate. In exchange for access to environmentally sensitive public lands, the Congress was assured by Alyeska and the owner companies that the pipeline system would be operated in a safe and environmentally sound manner, using state-of-the-art technology.

The oil industry betrayed its own promises and deceived the Congress with respect to operations of Alyeska and the Exxon Valdez oil spill. Without a commitment by the Department of Justice to prosecute this intentional deception, how is it that Congress and the people of the State of Alaska can rely on such assurances in the future?

Sincerely yours,

George Miller

MILLER TO JUDGES: OIL COMPANIES LIED ABOUT ABILITY TO CLEAN UP ALASKA OIL SPILL

WASHINGTON -- The oil companies responsible for responding to a major oil spill in Alaska's Prince William Sound knew at least a year before the massive March 1989 spill that they were unable to respond effectively, despite the company's sworn testimony to the contrary.

In addition, the Alyeska Pipeline Service Company, a consortium of seven major oil companies, including British Petroleum (majority owner), Arco and Exxon Corp., secretly scaled back its oil spill response plan without the approval of the federal or state government.

Congressman George Miller, D-Calif., vice chairman of the House Interior Committee, raised the charges in a 12-page letter to the federal judges now reviewing a proposed $1 billion settlement of claims against Exxon by the Justice Department and State of Alaska stemming from damages caused by the Exxon Valdez spill.

"This evidence raises serious questions as to whether the settlement should be approved in its present form," Miller said after releasing the letter.

Miller has conducted an ongoing investigation of Exxon and Alyeska since the March 24 spill. According to both state and federal law, Alyeska bears primary responsibility for responding to oil spills in Prince William Sound and the Port of Valdez, the port of origination of crude oil from Alaska's north slope.

"In the course of this investigation, Alyeska has provided me with documents which indicate that Exxon and the other owner companies which control Alyeska: (1) knew that Alyeska could not effectively respond to an oil spill in Prince William Sound; (2) failed to make necessary improvements in Alyeska's oil spill response capabilities; and, (3) secretly decided that Alyeska would not respond to an oil spill in Prince William Sound in the manner prescribed by Alyeska's Oil Spill Contingency Plan," Miller wrote.

The letter to U.S. District Court Judges H. Russel Holland and Stanley Sporkin was delivered on April 8. The judges are reviewing the settlement during a 30 day comment period that began on March 19. The judges, as well as the Alaska legislature, have the authority to approve or reject the settlement.

(more)

Alyeska, in a copyrighted Oil Spill Contingency Plan filed with State and Federal authorities, agreed to bear primary responsibility for oil spill cleanup in the entire Prince William Sound, and said that it was fully prepared to respond to a spill as large as 200,000 barrels (the Exxon Valdez spill was 260,000 barrels, or nearly 11 million gallons).

Miller's letter documents the fact that as early as 1984, Alyeska was made aware by its own staff that it could not respond to a major spill in Prince William Sound. By 1988, the company was convinced it was unprepared. Yet a July, 1988 document indicates that Alyeska's owner companies rejected an internal proposal to increase its equipment and capability and secretly decided to change its responsibility to respond to oil spills in the Sound. Instead of covering the entire Sound, the company secretly decided to respond only to spills close to the Valdez terminal. This change was never submitted to the state or federal government for approval.

Vice President Stanley Factor of Arco Marine, Inc., one of the owner companies, objected to recommendations to purchase new equipment and further stated that: "At the Owners Committee meeting in Phoenix, it was decided that Alyeska would provide immediate response to oil spills in Valdez Arm and Valdez Narrows only. Further efforts in the Prince William Sound would be limited to the use of dispersants and any additional effort would be the responsibility of the spiller." The chairman of the Owners Committee at that time was Darrell Warner, President of the Exxon Pipeline Company.

Miller noted that the Justice Department never brought charges against Alyeska stemming from the spill. Furthermore, the settlement with Exxon protects Alyeska from all criminal, and virtually all civil claims, by the state or the federal government.

"At my subcommittee's hearing on May 7, 1989 in Valdez, Theo Polasek [of Alyeska] testified under oath on Alyeska's behalf that '[w]e fulfilled our promises in that [oil spill contingency] plan. We have not broken our promises to the people of this State.'" Miller wrote to the judges.

"But the evidence I have set forth indicates that Alyeska broke the law as well as its promises to the State of Alaska and the Congress.

"In my view, the inclusion of Alyeska in the proposed Criminal Plea Agreement and in the proposed settlement Agreement and Consent Decree is contrary to the public interest. Based on the evidence, it is inconceivable that the Justice Department would waive its right to pursue criminal claims, and virtually all civil claims, against Alyeska.

"In sum," Miller wrote, the settlement "fails to hold Alyeska accountable to the public for its wrongdoing and fails to serve as a deterrent for similar conduct in the future.

"The oil industry betrayed its own promises and deceived the Congress with respect to operations of Alyeska and the Exxon Valdez oil spill. Without a commitment by the Department of Justice to prosecute this intentional deception, how is it that Congress and the people of the State Alaska can rely on such assurances in the future?"

###
